

# Mobilizing for Action through Planning and Partnerships

## Butler County

2015 Community Health Assessment

## Introduction

The overall mission of Four Corners Health Department is to promote health, prevent disease, and protect the environment improving the health of the Four Corners Community.

In April of 2015, Four Corners Health Department launched a community health assessment project that will have lasting effects for the entire public health system in the district. The purpose of a community health assessment is to describe the health status of the population, identify areas for health improvement, determine factors that contribute to health issues, and identify assets and resources that can be mobilized to address population health issues.

A community driven process, called MAPP, was chosen to complete the assessment. Mobilizing for Action through Planning and Partnerships (MAPP) is a dynamic process developed by the Centers for Disease Control and Prevention (CDC) and the National Association of City and County Health Officials (NACCHO) that helps communities prioritize public health issues and identify resources for addressing them. Community ownership is the fundamental component of MAPP.

The MAPP Advisory Committee was created to work through this process. Individuals representing 22 partner agencies from across the Four Corners District met regularly to work through the MAPP process as seen below.

## Background Information

In April of 2015, Four Corners Health Department launched a community assessment project that will have lasting effects for the entire public health system in the district. Mobilizing for Action through Planning and Partnerships (MAPP) is a dynamic process developed by the Centers for Disease Control and Prevention (CDC) and the National Association of City and County Health Officials (NACCHO) that helps communities prioritize public health issues and identify resources for addressing them. Community ownership is the fundamental component of MAPP.

The MAPP project includes four community assessments. In this report, we have focused on the results of the Community Themes and Strengths Assessment. The Community Themes and Strengths Assessment focuses on collecting the community's perspective on issues such as health care, education, care for older adults, jobs, support networks, health problems, and risky behaviors. A survey was designed by utilizing a sample survey provided by NACCHO. The survey can be found in Appendix A.

MAPP Advisory Committee members worked together to distribute paper copies of the surveys at community meetings such as Rotary, Kiwanis, or Sertoma Clubs. They were taken to churches, school events, county fairs, etc. The survey was distributed throughout the district from May to October 2015. Responses were received from 817 individuals. In **Butler** County, **116** responses were received. The compiled results of those **116** surveys are reported here.

Survey respondents were also asked about the following health problems:

- High blood pressure
- Aging problems (arthritis, hearing loss, etc.)
- Motor vehicle crash injuries
- Teenage pregnancy
- Domestic violence
- Accidental/unintentional injuries
- Mental health problems
- Rape/sexual assault
- Suicide
- Infectious diseases
- Childhood abuse/neglect
- Access to health care
- Respiratory/lung disease
- Dental problems

<i>answered question</i>		<b>105</b>

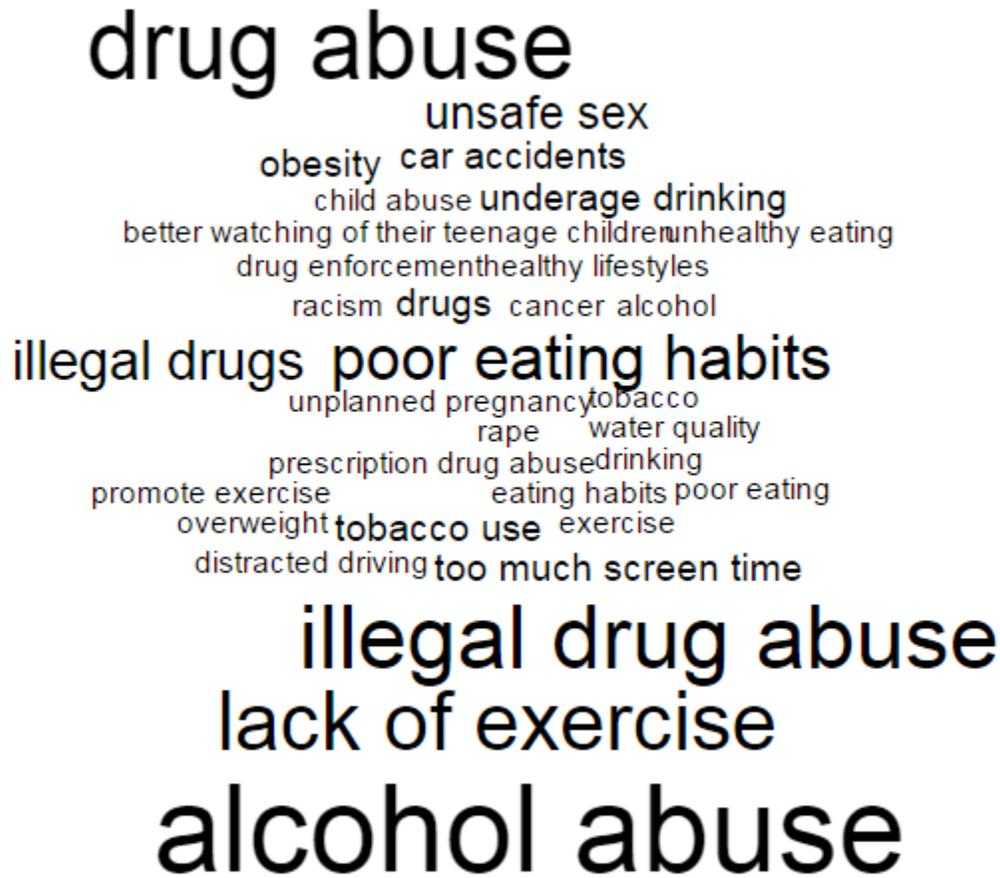

Survey respondents were also asked about the following risky behaviors:

- Tobacco use
- Not getting enough sleep
- Unsafe sex
- Not using seatbelts and/or child safety seats
- Racism
- Dropping out of school
- Prescription drug abuse
- Not getting shots to prevent disease
- Working too much

These risky behaviors, while important, were not considered as important to the residents of Butler County as the five listed in the table above.

**Of the health problems and risky behaviors that you marked, which one would you suggest the community work on?**

Answers to this question were compiled and assembled into a word cloud. A word cloud is an image composed of words used in a particular text or subject, in which the size of each word indicates its frequency or importance. In this instance, the size of the word indicates the number of respondents who answered that particular health issue. The largest words were the most common answers.

In addition to the data presented here, the Community Health Survey allowed residents the opportunity to comment on individual questions. Hundreds of comments were collected, and comments to specific questions can be made available upon request. For more information on specific questions or comments, please contact Four Corners Health Department.

The results of this Community Health Survey will be compiled with results from the other three MAPP Assessments:

- Community Themes and Strengths Assessment
- Local Public Health System Assessment
- Forces of Change Assessment

Upon completion of all four assessments, the results will be compiled into a comprehensive community health assessment. Data from this will be used by the Four Corners Community Health Assessment Advisory Committee to identify strategic issues and formulate goals and strategies to address those strategic issues. These goals and strategies will help inform future programs and initiatives of Four Corners Health Department and other community partners.
